PREFACE

BULB started in 2015 and had a long and steep road! This fifth book marks our next challenge. This of establishing and conveying the vision of a Balkan School of Street Photography.

Our goal is to record the ever going process of transition, transformed in the meantime in a Sisyphean task.

The photographers of this series find surrealism in objects, in stray animals and in human subjects, some times monadic and nomadic, some other times as a societal cluster.

Albeit the differences in their approach and photographic signatures they all are great talents and thoughtful servants of photography.

They transgress the obvious and create pictures with "noema" as a result of an intentional experience.

These insightful photographers bring with them their own vision and are not easily taken over by a superb light and a nostalgic scenery.

They are BULB photographers!
